DETAILED ACTION

Claim Objections

Claims 24,25, 27-29,65 and 66 are objected to because of the following informalities: These claims do not have a **status identifier**. Appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 14-71 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-13 of U.S. Patent No. 6,646,147. Although the conflicting claims are not identical, they are not patentably distinct from each other because the '147 patent claims a process for producing copper-containing and claims the following conditions: temperature, pH, dissolution rate and batch process. It would have been obvious to one of ordinary skill in the art at the time the invention was made to optimize the ranges since these are result effective variables

In re Boesch 205 USPQ 215

Claims 14-71 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-44 of copending Application No. 10/704,155. Although the conflicting claims are not identical, they are not patentably distinct from each other because the '155 application claims a process for producing a copper-containing aqueous solution and claims the following conditions: concentration of monoethanolamine, rate of copper dissolution, temperature, pH, and a batch process.**.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
